

Abstract Notices

The Editor of the *2020 ASCO Annual Meeting Proceedings* has authorized correction of the following:

128

Notice of Correction: “Determination of the ability of a novel, long-acting subcutaneous GnRH antagonist, VERU-100, to castrate without a testosterone surge in a rat model.”

In the Methods section, the volume of drug administered was incorrectly published as 200 ml. The actual volume administered was 200 μ l.

All errors have been corrected in the online versions of the abstracts on JCO.org and ASCO.org. This notice is updated on a rolling basis, as needed.
